Press Release
August 12, 2009

Jewell Receives Recertification of ISO 9001:2008 Requirements

Jewell Instruments is pleased to announce that they have, once again, been approved for certification against the provisions of ISO 9001:2008.

ISO is a family of standards for quality management systems maintained by the International Organization for Standardization. The assessment and certification processes are carried out by a variety of entities. Jewell was assessed and approved by NQA, USA, an accredited organization under the ANSI-ASQ National Accreditation Board. Jewell has proved its quality standards for the design and manufacture of inertial sensors, panel meters, solenoids, avionic instruments, partnership manufacturing and test equipment.

Jewell originally became certified in August of 2006. We are proud to continue our record of excellence and strive to maintain or exceed the recommended guidelines as established by the ISO.
