## Jewell Instruments Announces New Triplett Brand WireMaster HDMI

Jewell Instruments, LLC is proud to announce the addition of the WireMaster HDMI to its Triplett brand of products.

The WireMaster HDMI High Definition Cable Tester (Cat. No. 3254) is an advanced tester utilizing "X-TEST" technology which checks for Shorts, Opens, and Miswires in all RGB conductors. Most testers only test for Opens. It works with all types of HDMI cables with Type A connectors conforming to 1.0, 1.1, 1.2, 1.2a, 1.3, 1.3a, Category 1 and Category 2 cables. It employs both Auto-scanning for quick testing of all of the wires, and Manual testing for more rigorous testing on individual wires. It will test short patch cables or long installed cables. The WireMaster HDMI consists of a separate Transmitter and Receiver, which provides ultimate versatility, especially when cable ends are in different rooms. The cable is easily tested by connecting to the ends of the cable and observing the LED displays. A built in battery test informs the user when the 9 volt battery needs to be replaced. A Padded, Cordura Carrying Case is included and has a One Year Warranty. It has an MSRP of \$69.00

The WireMaster Mapper is available at any Triplett authorized distributor which can be found on our website at [www.triplett.com](http://www.triplett.com) under "Where to Buy".
